REACH COMPLIANCE / SVHC DECLARATION

Declaration on the REACH Regulation (EC) No 1907/2006 and the SVHC Candidate List

REACH Regulation (EC) No 1907/2006
The Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) Regulation (EC) No 1907/2006 establishes the legal framework for the manufacture, import and use of chemical substances within the European Union.

As a manufacturer of printing inks and related products, Durst Group AG acts as a downstream user under REACH. In cooperation with our raw material suppliers, we ensure that substances intentionally used in our formulations are registered where required and comply with applicable authorisation and restriction provisions (Annex XIV and Annex XVII).

To the best of our knowledge and based on supplier information, all substances used in our products are registered in accordance with REACH requirements where applicable.

SVHC Candidate List
This declaration refers to the Candidate List of Substances of Very High Concern (SVHC) published by the European Chemicals Agency (ECHA), as updated on 04 February 2026, comprising 253 entries.

Durst Group AG confirms that substances included in the current SVHC Candidate List are generally not intentionally added to our products above 0.1% (w/w).

Exception – The following substance may be present above 0.1% (w/w) in specific products:
Diphenyl(2,4,6-trimethylbenzoyl)phosphine oxide (TPO), CAS No. 75980-60-8

TPO was added to the SVHC Candidate List on 14 June 2023 due to its classification as Reproductive Toxicant Category 1B. Products containing TPO above 0.1% (w/w) are listed in Appendix A. Where applicable, TPO is declared in Sections 3 and/or 15 of the respective EU Safety Data Sheets in accordance with Annex II of REACH. Authorisation requirements under Annex XIV apply only if and when the substance is included in the Authorisation List.

All other Durst Group AG products do not intentionally contain SVHC substances above 0.1% (w/w).

The presence of analytically detectable trace impurities of SVHC substances cannot be excluded. Such traces may originate from raw material impurities or manufacturing processes; however, to the best of our knowledge, any such presence remains below 0.1% (w/w) unless explicitly stated otherwise.

We stay at your disposal for any further questions.

Durst Group AG
Global Product Safety & Regulatory (PSR)
Version: V1.0 – New statement

This declaration applies to products supplied in their original packaging and reflects our current knowledge as of the date of issue. This statement is valid without signature.

Appendix A – Products Containing TPO (SVHC) > 0.1% (w/w)
