

Declaration of conformity
Restriction of Hazardous Substances (RoHS) Directive 2002/95/EC and
Waste Electrical and Electronic Equipment (WEEE) Directive 2002/96/EC

All inks supplied by SunJet comply with the above directives.

The substances excluded under RoHS/WEEE are lead (Pb), mercury (Hg), cadmium (Cd), hexavalent chromium (CrVI), polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE). None of the products supplied by SunJet are based on these materials.

Any trace impurities are present well below the maximum levels specified. Specifically, by reference to our raw material suppliers' data, levels of single contaminating heavy metals, soluble in 0.1 M hydrochloric acid, expressed as content in dried ink film will not exceed :

Antimony (Sb)	125 ppm
Arsenic (As)	25 ppm
Cadmium (Cd)	25 ppm
Chromium vi (Cr vi)	50 ppm
Lead (Pb)	50 ppm
Mercury (Hg)	12 ppm
Selenium (Se)	50 ppm

In any case, the combined content of lead, mercury, chromium (vi) and cadmium will not exceed 100 ppm.

Random analyses of inks indicate that typical levels are significantly lower than the limiting values shown above.
