PER- AND POLYFLUOROALKYL SUBSTANCES (PFAS)

Per- and polyfluoroalkyl substances (PFAS) in Durst Inks

Durst hereby declares that, to the best of our knowledge and based on information from our raw material suppliers, the ink products we supply do not contain intentionally added per- and polyfluoroalkyl substances (PFAS).

Our current formulations do not make use of PFAS substances as defined by applicable regulatory frameworks, including those in force or under development in the European Union, the United States, and other relevant jurisdictions.

While the unintentional presence of trace amounts due to raw material impurities or manufacturing processes cannot be entirely excluded, PFAS are not used as ingredients in the manufacture of these products.

Durst is committed to regulatory compliance, product transparency, and responsible sourcing. We continuously monitor developments in global PFAS regulations and adjust our compliance practices accordingly.

We stay at your disposal for any further questions.

Best regards,

Dr. Stefan Kappaun, MBA
Executive Vice President Inks and Fluids
Durst Group
